Reviews

This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be play, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.

(Rene Olson)

INTELLECTICS AND COMPUTATIONAL LOGIC

Book Condition: New. Publisher/Verlag: Springer Netherlands | Papers in Honor of Wolfgang Bibel | 'Intellectics' seeks to understand the functions, structure and operation of the human intellect and to test artificial systems to see the extent to which they can substitute or complement such functions. The word itself was introduced in the early 1980s by Wolfgang Bibel to describe the united fields of artificial intelligence and cognitive science. The book collects papers by distinguished researchers, colleagues and former students of Bibel's, all of whom have worked together with him, and who present their work to him here to mark his 60th birthday. The papers discuss significant issues in intellectics and computational logic, ranging across automated deduction, logic programming, the logic-based approach to intellectics, cognitive robotics, knowledge representation and reasoning. Each paper contains new, previously unpublished, reviewed results. The collection is a state of the art account of the current capabilities and limitations of a computational-logic-based approach to intellectics. Readership: Researchers who are convinced that the intelligent behaviour of machines should be based on a rigid formal treatment of knowledge representation and reasoning. | Preface; S. Hölldobler. Prologue; C. Kreitz. A Confluent Connection Calculus; P. Baumgartner, et al. Prioritizing Default Logic; G. Brewka, T. Eiter. A Connection Calculus for Handling Incomplete Information; S. Brüning, T. Schaub. The Connection Method, Constraints and Model Building; R. Caferra, N. Peltier. Towards a Logical Characterisation of Sentences of the Kind 'Sentence p is About Object c'; R. Demolombe, L.F. del Cerro. The Cut Rule in Theorem Proving; E. Eder. Some Strengths of Nonmonotonic Reasoning; Uwe Egly, H. Tompits. Composing Re-usable Synthesis Methods through Graph-based Viewpoints; J. Eusterbrock. Proof Structures and Matrix Graphs; B. Fronhöfer. AI and Cognitive Science: Feedback Leads to a New Neural Concept; C. Herrmann. Matrix-based Constructive Theorem Proving; C. Kreitz, et al....
