Date :2010-01-01 . Mathematics is thought gymnastics. Measure of a person s level of mathematical literacy. the final sign is to see if he can use mathematical thinking to solve mathematical problems as well as everyday problems. In the new curriculum reform. the students learned math on weekdays has become increasingly practical. problem-solving skills also will be growing. In this basis. the students must have such a thirst for reading materials. the timely knowledge of textbooks to supplement and expand. the synchronization can be an extension of extra-curricular knowledge in the system of training to make their own thinking to a new level level. Based on this demand. we have bred for the series. Bentacongshu authors both have extensive teaching experience and experience in the preparation of math readers. In the preparation process. we combine first-line books teaching content. to grasp the knowledge of students with stage structure and level of thinking in order from the textbook. spiral. focusing on training. enlightenment thinking as the guiding ideology. and strive to reflect the...
