SCORING STOCKS AN ADAPTIVE SCORING SYSTEM FOR STOCKS DEBUNK MYTHS IN INVESTING

CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 152 pages. Dimensions: 8.7in. x 6.0in. x 0.4in. Enter the fundamental metric information such as PE on any 100 stocks into a scoring system. If the top 25 of the stocks perform a lot better than the rest in 6 months consistently, then it is a good scoring system. I have been using my own scoring system for years. It sums up the individual scores for selected fundamental metrics. When the total passes a certain number, evaluate the stock further for potential purchase. This scoring system has been updated many times for refinements and adapting to the changing market conditions. All metric information can be obtained from free or low-cost web sites. Many companies and academic projects must have worked on this kind of stock scoring systems. However, few if any can prove their systems work consistently. I may have found the reason why it does not work consistently. The fundamental metrics change from different market conditions. To illustrate, the current market conditions may favor value while some other conditions favor growth. I monitor the performances of all the fundamental metrics periodically and make changes accordingly. Hence, I call my scoring system Adaptive Stock Scoring System (do not use the acronym). This item ships from La Vergne, TN. Paperback.
