Q Directions. --Tack a sheet of printing paper on the table. Draw a straight line, MN, upon it (Fig. 57). At a point, O, in the line, erect a perpendicular, OP. Now place the mirror on the line, MN, with its plane normal to the paper. Set a third pin at B, so that on sighting along BO the image of A is seen directly behind O. Remove the mirror and draw the line BO with a finely pointed pencil. Measure the angles, BOP and AOP (26). Repeat several times, giving the angle of incidence, AOP, different values. Calculate the error of each observation. Remarks. --The alignment should be done close to the paper to reduce errors due to the pins not being set normally to the surface of the paper.
